

Dig safe this spring

April is National Safe Digging Month, making it the perfect reminder that every outdoor project should start with safety.

Liberty is committed to providing safe and reliable water service to our customers. As a water utility, we deliver clean, safe drinking water to homes and businesses through an extensive network of underground water mains and service lines. Our crews regularly inspect, maintain, and upgrade this infrastructure to deliver dependable service to the communities we serve.

Even routine digging can pose serious risks if underground water lines are damaged. Striking a buried water main or service line can lead to flooding, property damage, service interruptions, and costly repairs or fines. It can also disrupt water service for neighbors and the surrounding community. Before starting any digging project, no matter how small, it's important to take the proper steps to identify and avoid underground utilities.

The good news? Putting safety first is simple.

One free, easy call gets utility lines marked and helps protect you and others from injury and expense. **Before starting any digging project, know what's below by calling 811 or visiting www.call811.com.**

It's convenient, it's easy, and it's the law.
