

Cut Water Waste, Not Curb Appeal.

Your yard can look great and use a lot less water. Here's how, with this special offer for Liberty customers.

Most yards use 30 to 50% more water than they need because of timers that water on a schedule, not based on actual water needs. Rachio fixes that. For a limited time, Liberty customers can take advantage of special pricing so you can make the switch.

Your Yard. Smarter.

Rachio connects to your existing irrigation system in about 30 minutes. Once it's in, it pulls from local weather data, your zone settings, and seasonal factors to give your yard exactly the water it needs.

- Skips watering automatically when rain is in the forecast
- Adjusts run times based on temperature, wind, and humidity
- Custom zones for grass, garden beds, and trees
- Seasonal adjustments run in the background, no input needed
- Control and adjust from anywhere on your phone
- No new wiring needed
