

Local and Responsive. We Care.

We celebrated Fix a Leak Week by hosting a **Fix a Leak** Workshop in March! People were able to attend the workshop to learn how to detect and fix common leaks that occur inside and outside of their home! We were able to discuss their leak problems and help them find solutions too. Thank you to those who came and if you missed the workshop, you can still find Fix a Leak materials at our office or online at www.libertyutilities.com!

Beat the Peak

Water when the Sun's NOT up!

It's no surprise that our customers use most of their water between 6 a.m. and 9 a.m. when everyone is getting ready to start their day. All that water use coupled with high heat can put a strain on the system, so we ask that you adjust your irrigation controls for outdoor watering to take place outside of peak water use hours. An added bonus for watering your lawn before 6 a.m. or after 9 p.m. is that it helps save water too because less water will be evaporated by the sun and more will go directly to your plants!

- ✓ **Pay by Mail:** Please return the lower portion of your statement, "Payment Coupon", along with a check or money order in the envelope provided with your bill and mail to: Liberty Utilities, PO Box 52649, Phoenix, AZ 85072.
- ✓ **Automatic Payments with SurePay:** Sign up for Autopay with Surepay and your monthly payment will be automatically deducting from the account of your choice. Visit libertyutilities.com and click on "Make Payment" to sign up for SurePay.

Water Quality Report Coming Soon

Liberty Utilities Water Quality Report is on its way! This annual report is mandated by the United States Environmental Protection Agency and state environmental agencies to every water utility. It allows us to communicate with you about water quality and analytical water quality data.

WHICH IRRIGATION SYSTEM WORKS FOR YOU?

July is Smart Irrigation Month! Prepare for the summer by using the most water efficient techniques and systems!

SMART IRRIGATION SYSTEM

Smart Irrigation systems tailor watering schedules and run times automatically to meet specific landscape needs. These controllers significantly improve outdoor water use – saving water and money.

DRIP IRRIGATION

Drip irrigation is a type of watering system to save water by allowing water to drip slowly to the roots of plants. The system will place water directly into the soil, on the roots, to minimize evaporation and water efficiently. **Check out our video on our Smart Water Use page at www.libertyutilities.com to see how to install drip irrigation yourself!**

HAND WATERING

If you have to hand water, make sure you use a soil probe or long screwdriver and plunge it into the soil to ensure the moisture is 6 – 10 inches deep. This will make sure you do not overwater. Overwatering can lead to root rot and soil compaction that robs the roots of oxygen.
