

Committed to our Veterans

Liberty Utilities is committed to our veterans and active duty military personnel. We want to celebrate the brave men, women, and their families who serve for our freedom. We are very proud to employ veterans and support those current and former members of the military with volunteering and financial support. As of June 2019, there are 145 veterans that work in our company across the United States.

We are always exploring opportunities to support our military and veterans. If you have a cause you are passionate about that you would like to bring to our attention, call us at **844-367-2029**.

Liberty Utilities wants to thank all
active duty military and veterans for their service!

With the winter months coming up, now is a good time to start prepping your home to prevent winter damage. Here are some tips for winter preparation:

- ▶ Wrap your pipes with insulation.
- ▶ Fix drafty windows and plug drafts around doors.
- ▶ Keep your home temperature set no lower than 55°F.
- ▶ Disconnect garden hoses and drain the water that remains in faucets.
- ▶ Know the location of and how to shut off your main water valve in case you have a pipe burst.

DO YOU KNOW WHERE YOUR SHUT OFF VALVE IS?

Knowing where your main water shut-off valve is crucial for limiting water waste when leaks occur, repairs need to be made, or in the event of an emergency. Your main water shut off valve is located on the front or side of your house below the hose bibb. See the photos for common set-ups. Check your valve to make sure it is working properly as rust or damage can occur over time. By ensuring you have a shut off valve that works properly, you can help reduce unnecessary water waste.

LIBERTY UTILITIES OPERATOR CERTIFICATION PROGRAM

Liberty Utilities recognizes the importance of operator certification in the water and wastewater industry to continually provide safe and reliable services. An Operator Certification Program was created to encourage employees to attain certification levels above the minimum requirement for their position. We have had operators go above and beyond to learn more about the water and wastewater industry with this program. Through learning programs like these, Liberty Utilities demonstrates that safe and reliable water and wastewater services will always be our priority.

Planting a tree? Installing a fence? Planning a home improvement? Call 811.

If you're planning any type of excavation, call 811 at least three-full working days before digging, drilling, or blasting. When you call 811, the national Call Before You Dig center will notify Liberty Utilities and other participating utilities, allowing us to mark our underground wires, pipes, or cables so you'll know what areas to avoid. This service is provided free of charge.
